EXPERIENCE

D'Allessandro Corporation | *AI Automation Solutions Consultant*

Present

- Engineered an OpenClaw-powered internal analytics platform that analyzed multi-year business records across multiple data sources, automating risk scoring and surfacing insights for executive review
- Built a Chrome extension that automated quarterly equipment insurance rate updates, cutting a manual 2-day process to 15–20 minutes by handling equipment searches, PDF downloads, rate extraction, and Excel updates

Microsoft | *Software Development Engineer*

Oct. 2024 - May 2026

Copilot / BIC AI Platform

- Reduced security risk in production codebases by leading Common Vulnerabilities and Exposures (CVEs) investigation and remediation, including dependency upgrades and pipeline fixes while ensuring safe deployment across shared AI platform services

Copilot Studio

- Built and supported full-stack infrastructure for Copilot Studio by delivering an end-to-end AI scenario configuration portal (**C#, React, Kusto, Python, ASP.NET**) on Unify, Thus, improving load performance by ~60× and enabling self-service management for LLM scenario configuration, shadow experimentation, and A/B testing
- Created agents and tools to monitor and benchmark top LLMs to provide various Copilot teams with reliable, data-driven model and configuration metrics such as Citation Correctness & Consistent Language
- Led technical demos of new features to various Copilot teams, incorporating feedback into product development in collaboration with data scientists/end users

Office365 Admin Center

- Enhanced UI/UX for billing and volume licensing customers within the Office365 Admin Center (**React/Redux, Node.js**) in an Agile environment
- Engineered end-to-end automation (writing/maintaining/running) for UX tests using **GitHub Copilot + Playwright MCP**, boosting coverage 25% and enabling natural-language test authoring for devs and non-devs
- Built bulk role assignment feature across 1000+ roles, improving performance by ~40% via batch API calls
- Optimized coachmarks using telemetry from 200K+ sessions/month, boosting click-through rate by 25%

HealthEats | *Founding Engineer*

Jun. 2025 - Dec. 2025

- Led technical development for restaurant discovery startup focused on verified health and nutrition transparency
- Built end-to-end user experiences across iOS and web (**Swift/SwiftUI, React**) backed by **Firestore + Firebase**
- Drove early company efforts beyond engineering, including mentoring a technical intern and contributing to hiring, marketing, and product strategy with a team of 6 in an Agile environment

OTHER EXPERIENCE

NYU Baedeker (travel magazine) | *Technology Chief*

2023 - 2024

- Led technical team of 6; projects included leading complete overhaul of [website](#), implementing native PDF hosting/embedding ([ex](#)) reducing costs by ~40%; developing centralized GitHub [repository](#); migrating to modern web hosting platform with in-depth analytics leading to improved reach

EDUCATION

New York University – New York, NY

Sep. 2020 - Jun. 2024

Major: Computer Science B/A, **Minor I:** Data Science; **Minor II:** Media, Culture, and Communication

SKILLS

Languages: Java, JavaScript, TypeScript, C#, Python, R, C, C#, C++, HTML, CSS, SQL, KQL, Swift, x64 Assembly

Tools & Frameworks: React, NodeJS, Redux, Azure, Postgres, Redis, OpenAI API, Copilot, MCP, AWS, Firebase,

SwiftUI, Figma, Tableau, PowerBI, Matplotlib, SSMS, Kusto, Langchain, Pandas, Numpy, Scikit-learn, TensorFlow, Flask

Interests: Music Composition, Video Production, Game Design, Tennis
